Primary Maths Challenge

Dear Parents/Carers,

We are delighted to inform you that your child has been nominated by their teacher to take part in the Mathematical Association's Primary Maths Challenge.

The challenge has been specifically created to give pupils, UK and worldwide aged between 9-11, the opportunity to take part in a fun mathematical challenge. They will have 45 minutes to answer 25 questions, 20 of which are multiple choice questions. The questions start easy, but do get progressively more difficult. The questions will encourage pupils to think outside the box and approach problems logically. I have attached two past papers to give the children an idea what to expect. Further past papers can be found here.
https://www.primarymathschallenge.org.uk/downloads.

The challenge will take place during the weeks 10-21st November 2025. After they have completed the challenge, they will receive a certificate to celebrate their participation. Children who score highly will be invited to a bonus round in February 2026.

If you have any further questions about the challenge, please do not hesitate to contact me.

Kind regards,

Gwyn Hubball-Barnard
Assistant Head
Manorside & Tudor Primary Schools
